 SANTEVIA®

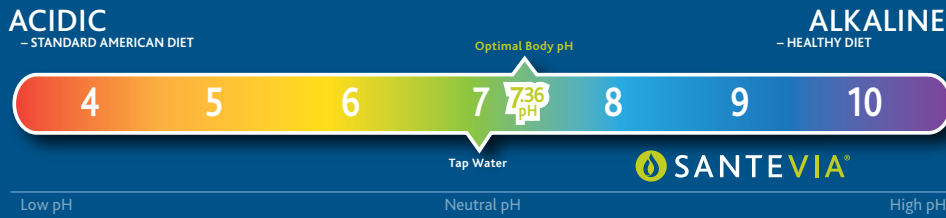

Mineralized Alkaline Water

9 CUP PREMIUM ALKALINE PITCHER

ENGLISH  
USER  
MANUAL

# pH BODY BALANCE

Your pH level impacts ALL of your body's cells, tissues, glands, organs, and organ systems – that's EVERYTHING in your body. Increasing your alkalinity to 7.36 alleviates stress on your organ systems right down to the cells, helping your body fight off illness and disease.

## MINERALIZATION

Your body requires essential minerals to maintain important metabolic pathways; essential minerals that your body cannot produce on its own must be obtained through your diet. The Santevia Alkaline Water Pitcher provides you with mineralized water which includes many of the essential minerals such as calcium and magnesium, as recommended by the World Health Organization.

## OUR PLASTIC

The Santevia Alkaline Water Pitcher is BPA Free. Polypropylene (PP) (#5) is used in the Santevia pitcher. Research has shown that PP5 does not leach any carcinogens or endocrine disrupters.

*According to the Green Guide, our plastic is categorized as the Safest Reusable Plastics for Holding Food and Water.*

# ABOUT OUR FILTER

100 grams of granular activated carbon. More than twice the filter media of the standard pitcher filter.

Filters chlorine, heavy metals, industrial chemicals and agricultural contaminants.

80 grams of ionic mineral balls add calcium, magnesium and beneficial minerals like iron, zinc, and manganese into your water.

## FILTER FACTS & TIPS

- 300 liters – double the water produced by most pitchers
- Quick filtering – water flows through in 1.5 minutes
- Each filter produces 1,250 glasses
- Replace every 2 months

Do not store your Santevia Alkaline Water Pitcher in direct sunlight and keep the pitcher away from heat sources such as a stove. Clean your pitcher each time you replace the filter.

## BEFORE YOU USE

**1** WATCH the assembly video at [santevia.com](http://santevia.com)

**2** CHECK all parts for missing or damaged pieces.

**3** WASH the pitcher, reservoir and lid by hand with a natural detergent and water (do not use dishwasher). Do not submerge the lid in water as it could damage the electronic countdown clock.

**4** RINSE your filter by placing it under running water for 2 minutes, tilt it from side to side, and then repeat until water runs clear.

**5** ASSEMBLE the pitcher by placing the filter into its housing at the bottom of the reservoir of the pitcher. Push the filter to the bottom of the housing until it is firmly wedged in place. Insert the reservoir into the pitcher; then place the lid on top of the pitcher unit.

**6** PREPARE your pitcher by running two upper tanks of water through the pitcher. Discard this water or use it for your plants.

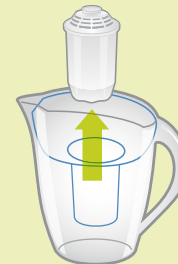

## HOW TO USE

**1** FILL your pitcher by placing the water stream over the covered oval opening and allow water to fill the reservoir. The easy-fill lid will automatically close when the reservoir is full.

**2** SET the reminder gauge by holding down the set button firmly until the clock blinks four times. The countdown clock begins at 60 days (2 months), and decreases by one each day. When the clock reaches 0, two months has passed and it's time to replace your filter.

**3** REPLACE your filter by pulling upwards on the filter until it frees from the reservoir. To recycle your filter, crack open the plastic housing, and discard the natural contents into your garden or compost. Recycle the plastic housing in your plastic recycling bin. Insert a new filter by following the previous instructions.

### FILTER EASE:

Sign up for our Filter Ease program to get notifications when it is time to replace your filter.

Sign up online at:  
[santevia.com/filterease](http://santevia.com/filterease)

### NOTE:

The settling of carbon charcoal (fine black, silver or white powder) on the bottom of the pitcher during regular use is normal. It is a natural element and is not harmful if ingested.

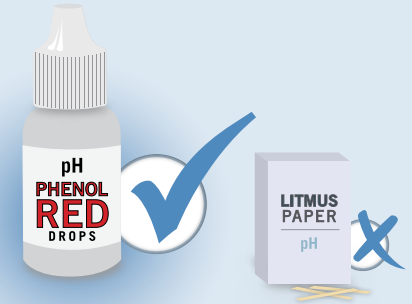

# INDEPENDENT TEST

	SANTEVIA ALKALINE PITCHER	ORDINARY PITCHER
IMPROVES TASTE & ODOUR	✓	✓
<b>CHLORINE REDUCTION</b> Improves taste & removes odour	✓	✓
<b>ECO-FRIENDLY</b> Each Santevia Pitcher can eliminate up to 8,300 single-use plastic water bottles every year	✓	✓
ALKALINE	✓	✗
<b>ADDS ESSENTIAL MINERALS</b> Adds calcium, magnesium, and other beneficial minerals as recommended by the World Health Organization.	✓	✗
<b>IMPROVES ORP (oxidation reduction potential)</b> Delays the aging of cells	✓	✗
FILTER LIFE	80 gallons/ 300 liters	40 gallons/ 151 liters
AVERAGE COST PER GALLON/LITER	\$0.15 gallons/ \$0.04 liters	\$0.15 gallons/ \$0.04 liters

# TESTING YOUR WATER pH AT HOME

To test the pH of your water, use phenol red drops. Litmus paper/pH strips are not meant to measure water pH and will not give you an accurate reading.

Using a phenol red test kit, add 5 drops of phenol red to the water in your test tube. Then compare against the colour chart to get a sense of the pH value of the water.

## 🔥 SANTEVIA® pH VALUE COMPARISON CHART

Optimal body pH: 7.36

Note: This colour chart is for comparison purposes only and is not intended as an absolute measurement method.

A water test kit can be purchased online at [santevia.com](http://santevia.com)

## pH SHIFT

Santevia products normally produce water with a pH of 9.0 or higher, or a pH shift of 2.0 above tap (input) water. Results may vary according to the pH of the input water.

## WARRANTY

The Santevia Alkaline Water Pitcher has a 30 day money back guarantee and is warranted to be free from defects in workmanship for the period of 90 days. Warranty commences from date of purchase. Proof of purchase is required and the product must be returned to the place purchased. Santevia Water Systems will repair or replace, at its option, any defective parts covered by the warranty. Shipping and handling are not included in the warranty. Your retailer will advise you on whether the defective item needs to be returned to Santevia Water Systems for failure analysis.

---

## CONDITIONS & LIMITATIONS

None of the warranties cover damage by improper use or maintenance accidents, acts of God, or minor scratches or imperfections that do not materially impair the operations of the product. The warranties also do not cover products that are not installed as outlined in the applicable product owner's manual. Santevia Water Systems does not assume any liability for personal injury or property damages caused by the use or misuse of its products. All Santevia water products must be used with potable, biologically safe water. Santevia Water Systems shall not in any event be liable for special, incidental, indirect or consequential damages. Santevia Water Systems' liability shall, in all instances, be limited to replacement of the defective product or part and this liability will terminate upon the expiration of the applicable warranty period.

## GOOD TO KNOW

Do not store your Santevia Alkaline Water Pitcher in direct sunlight and keep it away from heat sources such as a stove.

Clean your system each time you replace the filter.

To purchase new filters, visit [santevia.com](http://santevia.com) or a Santevia retailer near you. A list of locations in Canada and the United States is available on our website.

Boil water advisories – if your municipality is under a boil water advisory, you must boil your water prior to use with the Santevia Alkaline Water Pitcher.

The system is designed for use with biologically safe, potable water only. If you are unsure whether your water is biologically safe, please contact your local water sanitation organization for more information or have your water tested at a certified laboratory.
